

Managed Drug Limitation Program

Prescription drug list

The managed drug limitation program (MDL) helps us promote safe, clinically appropriate drug usage. With this program there's a limit on the amount and days' supply of certain medications, such as sleeping pills. These limits were developed based on recommendations from a variety of medical experts, including the Food & Drug Administration. If you've exceeded a limit and your physician believes you need

an additional supply of a medication, our medical directors will review the request for medical necessity.

If you have any questions or concerns, please contact Member Services at (800) ONE-8081 (800-663-8081). This list is for informational purposes only and is subject to change. To confirm coverage, please contact your plan administrator or call the customer service number on your health plan ID card.
